EDUCATION

Pakistan Institute of Engineering and Applied Sciences (PIEAS)   **Islamabad, PK**
Bachelor's in Computer Science   *October 2021 – Expected June 2025*

- **Coursework:** Data Structures and Algorithms, Design and Analysis of Algorithms, Operating Systems, Object Oriented Programming Computer Fundamentals and Programming, Software Engineering, etc.

WORK EXPERIENCE

Lets Grow More   **India (Remote)**
React JS Intern   *May 2023 – June 2023*

- Got selected out of a pool of 1700+ applicants for The Lets Grow More Internship program 2023.
- Worked as a frontend developer under direct Supervision of a Mr. Aman Kesarwani to write reusable andclean components using React.js and regularly got my code reviewed by the seniors to ensure good code quality and clean architecture in the product.
- Coordinated with Quality Assurance Engineers, Backend Engineers, DevOps Engineers, UI-UX designers.

Projects

WeatherApp – To fetch real-time weather data for any city in the world, I integrated the OpenWeather API into the app. This was achieved using the Axios library, which makes it easy to send HTTP requests and handle responses in JavaScript.

Quiz App – I used functional based components. The app includes a range of questions from different categories, and I added the questions directly in the code instead of fetching them from an API.

Todo List App - I used concepts of React hooks, especifically useEffect and useState.

One of the standout features of my Todo List App is its local buffer storage capacity. With this functionality, even if a user refreshes the page, their tasks remain intact until they choose to delete them by simply clicking the delete button/icon.

Activities

***Team Member (Web Development)*, GDSC PIEAS**   *April 2022 – August 2022*

- Worked on raising awareness among the freshman about current and future opportunities in web dev.
- Also arranged and managed some seminars and workshops.

Skills

Technical Skills: *Frontend*: React.js, Next.js, Redux, TailwindCSS, Bootstrap, HTML, CSS; *Backend:* Node.js, Express.js, MongoDB, Mongoose; *Tools:* Git, Github, Postman, Canva, Dev C++, VS Code ; *Others:* JavaScript, C/C++

SoftSkills: Leadership, Time management, Effective communication.

Languages: Fluent in English and Urdu.
